September 8, 2017

OPTIVER
AMSTERDAM, NETHERLANDS

Job Application for the role of Graduate Software Developer

Dear sir or madam,

I started out a few days ago listing the best places outside India I'd love to start my career at, and came across Optiver through our Internal Notice Board. Reading about the experiences on Glassdoor has only made me more and more curious with regards to the joy of working at Optiver.

I am devoted to the field of Computer Science and have been exploring several fields over the last couple of years. Having completed two engineering internships previously, I've narrowed down my research interests to Natural Language Processing (NLP) and Machine Learning (ML). I am proficient with several front-end and back-end technologies, and open to work on either end of the spectrum. I was offered a full-time position in Adobe at the end of my internship. I have expanded my rhetorical skills greatly over the past years thanks to a fair level of public speaking during my internship.

I am a conscientious person who believes in hard work and attention to detail. I thoroughly enjoy working with a team, as it helps expand my thinking capabilities and ideas. I'm flexible and usually quick to pick up new skills. Thanks to the brilliant work culture currently installed at Optiver, I believe I will be able to work at maximum efficiency and make more than satisfactory contributions to the project(s) allotted. I would really hope to be able to come to work every day to a place where I knew not only are my technical skills valuable, but my personal philosophies are as well.

The reason I believe I would be a perfect fit at Optiver, and vice-versa, is the very fact that the interminable opportunities that Optiver has on offer are the very challenges I am passionate about solving using the technical skills I've acquired. And being able to be a part of a company like Optiver not only makes me excited, it comes with the assurance of knowing I'd be working with some of the best engineers in the world and would provide endless opportunities to learn and improve my skills as a Computer Science major.

I look forward to speaking with you in further detail about the full time role and opportunity with Optiver. This would be a great opportunity and I strongly believe that if given a chance I will prove myself and contribute to the growth & success of the company.

Sincerely,

Himanshu Verma
