EDGEVERVE SYSTEMS
BENGALURU, INDIA

Job Application for the role of Software Developer Intern

Dear sir or madam,

I am Himanshu Verma, currently pursuing my Dual Degree (B.Tech + M.Tech) in Computer Science and Engineering at IIT-Kharagpur. I am devoted to the field of Computer Science and have been exploring several fields over the last couple of years. I interned at Flipkart Internet Pvt. Limited, Bangalore, India in Summer 2016. I've narrowed down my research interests to Natural Language Processing (NLP) and Machine Learning (ML). I am proficient with several front-end and back-end technologies, and open to work on either end of the spectrum. I have expanded my rhetorical skills greatly over the past years thanks to a fair level of public speaking during my internship.

I am a conscientious person who believes in hard work and attention to detail. I thoroughly enjoy working with a team, as it helps expand my thinking capabilities and ideas. I'm flexible and usually quick to pick up new skills. Thanks to the brilliant work culture currently installed at EdgeVerve, I believe I will be able to work at maximum efficiency and make more than satisfactory contributions to the project(s) allotted. I would really hope to be able to come to work every day to a place where I knew not only are my technical skills valuable, but my personal philosophies are as well.

The reason I believe I would be a perfect fit at EdgeVerve, and vice-versa, is the very fact that the interminable opportunities that EdgeVerve has on offer are the very challenges I am passionate about solving using the technical skills I've acquired. I would constantly seek to collaborate, contribute and learn along the process of achieving the end goal.

I look forward to speaking with you in further detail about the internship and opportunity with EdgeVerve. This would be a great opportunity and I strongly believe that if given a chance I will prove myself and contribute to the growth & success of the company.

Sincerely,

Himanshu Verma
